

# Eclipse 的版本选择，安装，汉化及常见问题

By: マンノカゲ

首先我们要找到 eclipse 论坛的下载地址：

<https://www.eclipse.org/downloads/packages/>

官方提供三个安装版本：**在线安装版**（正式版），**免安装压缩版**（正式版），**开发者预览版**。此处推荐免安装压缩版，下载时请选择国内节点，以达到最短时间下载。（在线安装版虽然提供的是正式版，但受网络波动较大下载耗时，而开发者版虽功能较新颖，但可能存在未知 BUG）

根据自己的情况选择适合自己学习和开发的需要选择适合自己的功能版，

### How To Combine Packages

These packages are provided as a convenience to users; they represent common configurations of Eclipse projects that are often used together. However, since Eclipse is, at its core, an expandable platform, you can easily add other features and plugins to any of these packages. Just choose and install the package that most closely meets your needs, then follow these instructions to add features that you need.

## 汉化

也许对于像我一样的英语渣来说，这样的软件也是一种煎熬，所以为了今后的学习，我会千方百计的将界面变为中文菜单，此处提供两种官方方式：

## Eclipse Babel Project Downloads

### Babel Language Packs R0.17.0 are now available!

Babel Language Packs R0.17.0 for 2019-06, 2018-12, and Photon release trains are now available! Translations in all languages for all projects in Babel up to 2019/07/13 are included in R0.17.0.

Babel is currently setup to accept translation contributions in [47 languages](#) for about 40+ Eclipse projects and sub-projects. Participation for each language and each project may vary. For some of the most common projects, the completion percentages are very high. See the [Babel Translation Statistics](#) for more details.

All downloads are provided under the terms and conditions of the [Eclipse Foundation Software User Agreement](#) unless otherwise specified.

The Babel project produces language packs from the translations entered using the [Babel Translation Tool](#). You can download the Babel Language Pack Zips from the following links, or use the Babel Language Pack Update Sites to download the languages packs.

### Installing the language packs

- Open the install wizard with 'Help' > 'Install new software...'
- Add the Babel p2 repository <https://download.eclipse.org/technology/babel/update-site/R0.17.0/2019-06/>
- Select/install your language pack of choice
- Restart Eclipse and you should get a translated Eclipse

### Using the language packs

If the system locale for your operating system is already in the language you want to launch Eclipse in, all you have to do is to launch Eclipse normally and the language packs will be loaded.

If the system locale is in English, and you want to launch Eclipse in another language, you have to launch Eclipse with the `-nl` command line argument:

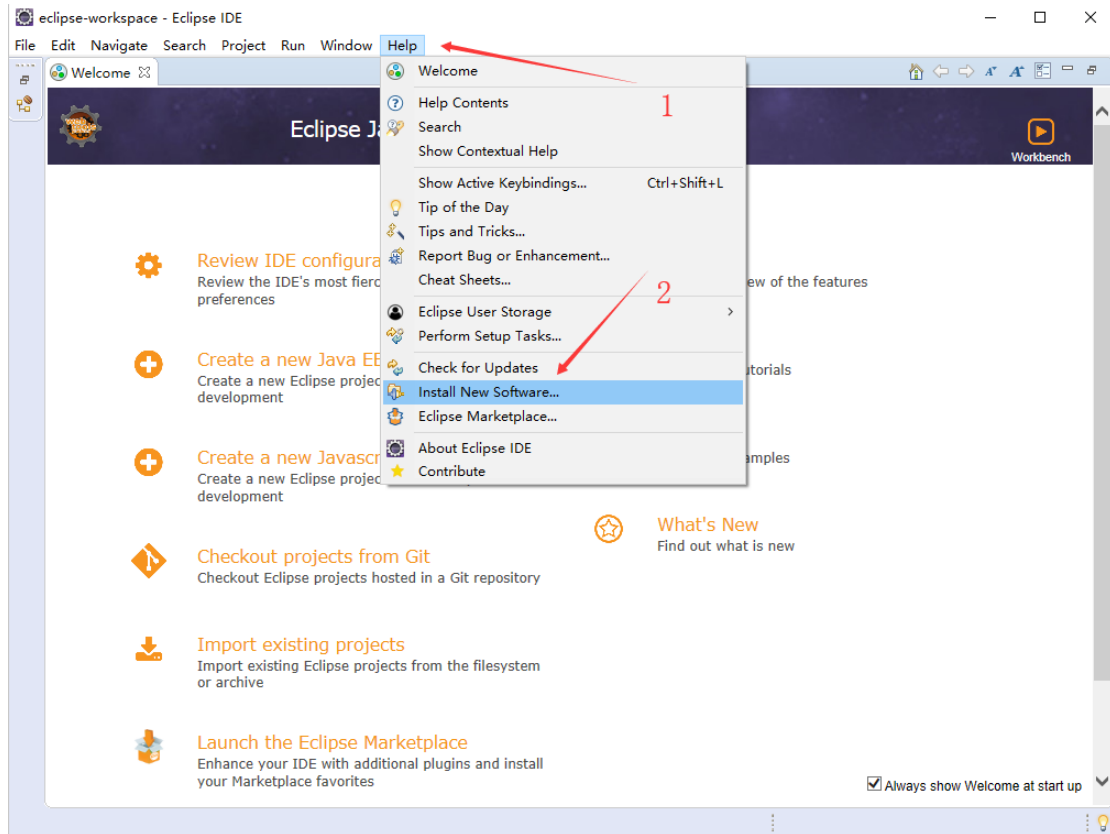

```
eclipse.exe -nl fr
```

Replace `fr` with the locale you wish to use. See "[Running Eclipse](#)" for more details. Also see the "[Teach Your Eclipse to Speak the Local Lingo](#)" Eclipse Corner Article for more examples on how to launch Eclipse in different languages (including bi-directional language like Arabic) and different operating systems (like Linux and Mac OS X).

将下载的语言包文件夹提取出来与 eclipse 文件夹合并，提示覆盖全部选是：

此处效果与①效果相同，故不做重复演示。

#### 注意事项：

①：工作空间会存放你今后的项目空间，源码及各种工程，为保证今后工程的安全性，请将工作空间目录设置到非系统盘或经常被软件读写的目录；

②：当第一次打开 eclipse 时，提示工作空间创建失败的选项时，检查你所选择的目录是否具有当前登入 windows 账户对该目录的完全读写权限，如果出现这种情况，请通过该目录的安全选项卡授予该目录的完全控制权限，或者选择其它拥有权限的目录。

至此，eclipse 基本安装配置已完成，尽情愉快的学习 JAVA 吧！
